Subject Index to Volume 176

Methods

Theoretical

Many body and quasiparticle approaches

Exchange mediated pairing as a source of superconductivity in alkali-doped C_{60}, L. Jansen, L. Chandran and R. Block 176 (1993) 1

Solvent relaxation dynamics and electron transfer, M. Bixon and J. Jortner 176 (1993) 467

The two-state reduction for electron and hole transfer in bridge-mediated electron-transfer reactions, S.S. Skourtis, D.N. Beratan and J.N. Onuchic 176 (1993) 501

Self-consistent environmental fluctuation effects on the electronic tunnel factor and the activation Gibbs energy in long-range electron transfer, A.M. Kuznetsov, M.D. Vigdorovich and J. Ulstrup 176 (1993) 539

Coupling schemes and perturbative treatments

Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. I. Exchange states, *g*-factors, hyperfine interactions, M. Belinskii 176 (1993) 15

Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. II. Double exchange in distorted cluster, M. Belinskii 176 (1993) 37

Electronic coupling through saturated hydrocarbon bridges, M.J. Shephard, M.N. Paddon-Row and K.D. Jordan 176 (1993) 289

Radiative and nonradiative electron transfer in contact radical–ion pairs, I.R. Gould, D. Noukakis, L. Gomez-Jahn, R.H. Young, J.L. Goodman and S. Farid 176 (1993) 439

Transport quantum mechanics

Symmetry states of vibronic Frenkel excitons, M. Georgiev and J. Singh 176 (1993) 47

Hole, electron and energy transfer through bridged systems. VIII. Soliton molecular switching in symmetry-broken Brooker (polymethinecyanine) cations, J.R. Reimers and N.S. Hush 176 (1993) 407

Equilibrium statistical mechanics

Statistical rate theory of gas-phase electron transfer. The ferrocene/ferrocenium self-exchange reaction, D.E. Richardson and J.R. Eyler 176 (1993) 457

Ab initio schemes for stationary properties

Jahn–Teller distortions in solid C_{20} and other fullerene structures, G.B. Adams, O.F. Sankey, J.B. Page and M. O'Keeffe 176 (1993) 61

Ab initio calculations of the core ionization spectra of unsaturated hydrocarbons, A. Baldovin, G. De Alti, P. Decleva, G. Fronzoni and A. Lisini 176 (1993) 67

Ab initio potential energy surface for the collisional system $H^- + H_2$ and properties of its van der Waals complex, J. Stärck and W. Meyer 176 (1993) 83
Transfer of mobile electrons in organic molecules, S. Larsson and M. Braga 176 (1993) 367
Superexchange pathway calculation of long-distance electron coupling in $H_2C(CH_2)_{m-2}CH_2$ chains, L.A. Curtiss, C.A. Naleway and J.A. Miller 176 (1993) 387

Computational and simulation methods
Simulation of water solutions of Ni^{2+} at infinite dilution, M.N.D.S. Cordeiro, A. Ignaczak and J.A.N.F. Gomes 176 (1993) 97
Analysis of static and dynamic electron and spin properties within the interaction space of the one-dimensional Hubbard chain; a path-integral quantum Monte Carlo approach, M.C. Böhm, J. Schulte and S. Philipp 176 (1993) 109
Superexchange pathway calculation of long-distance electron coupling in $H_2C(CH_2)_{m-2}CH_2$ chains, L.A. Curtiss, C.A. Naleway and J.A. Miller 176 (1993) 387
Inhomogeneous electron transfer kinetics in reaction centers of bacterial photosynthesis, Z. Wang, R.M. Pearlstein, Y. Jia, G.R. Fleming and J.R. Norris 176 (1993) 421
Well and barrier dynamics and electron transfer rates. A molecular dynamics study, B.B. Smith, A. Staib and J.T. Hynes 176 (1993) 521
Solvent dynamical effects in electron transfer: molecular dynamics simulations of reactions in methanol, D.K. Phelps, M.J. Weaver and B.M. Ladanyi 176 (1993) 575

Molecular dynamics and scattering theory
Symmetry states of vibronic Frenkel excitons, M. Georgiev and J. Singh 176 (1993) 47
Effect of tunneling systems on impurity homogeneous optical bands in amorphous solids, D.V. Donskoi, N.N. Zaitsev and I.S. Osad'ko 176 (1993) 135
A hard shape potential model for atom–symmetric top inelastic cross sections, J.C. Belchior, J.N. Murrell and S.D. Bosanac 176 (1993) 155

Experimental

Microwave spectroscopy
Microwave spectrum of $^{35}ClCN$ in excited vibrational states, L.B. Favero, S. Melandri and P.G. Favero 176 (1993) 165

Infrared spectroscopy
Multiphoton multi laser spectroscopy of the ν_3 mode of SF_6 in a molecular beam, S. te Lintel Hekkert, A.F. Linskens, I. Holleman, B.G. Sartakov, G. Pierre and J. Reuss 176 (1993) 171

Visible and UV spectroscopy
Photodetachment from laser-desorbed C_2^-, P. Wurz and K.R. Lykke 176 (1993) 185
Amino derivatives of symmetric 1,3,5-triphenylbenzene. Nature of the polar singlet excited state., G. Verbeek, S. Depaemelaere, M. Van der Auweraer, F.C. De Schryver, A. Vaes, D. Terrell and S. De Meutter 176 (1993) 195
The mechanism of intramolecular energy transfer in terminally substituted polyene molecules, N. Holl, H. Port, H.C. Wolf, H. Strobel and F. Effenberger 176 (1993) 215
UV–visible linear dichroism of naphthalene bicarboxylic acid derivatives dissolved in nematic liquid crystal, D. Bauman and H.-G. Kuball 176 (1993) 221

Electron transfer chemistry of hydride and carbanion donors. Hydride and carbanion transfer via electron transfer, S. Fukuzumi, T. Kitano, M. Ishikawa and Y. Matsuda 176 (1993) 337
Quenching of the excited state of hydrated europium(III) ions by electron transfer, K.M. Christensen, A. Bakac and J.H. Espenson 176 (1993) 359
Electrochemical and spectroscopic manifestations of donor–acceptor coupling in cyanide bridged transition metal complexes: Contrasts between Ru–CN–Ru, Co–Ru and Rh–CN–Ru systems, J.F. Endicott, X. Song, M.A. Watzky, T. Buranda and Y. Lei 176 (1993) 427
Observation of temperature independent heterogeneous electron transfer reactions in the inverted Marcus region, J.E. Moser and M. Grätzel 176 (1993) 493

Fluorescence spectroscopy
Radiative and nonradiative electron transfer in contact radical–ion pairs, I.R. Gould, D. Noukakis, L. Gomez-Jahn, R.H. Young, J.L. Goodman and S. Farid 176 (1993) 439

Photoelectron and Auger spectroscopy
Exchange mediated pairing as a source of superconductivity in alkali-doped C_{60}, L. Jansen, L. Chandran and R. Block 176 (1993) 1

Laser methods
Multiphoton multi laser spectroscopy of the ν_3 mode of SF_6 in a molecular beam, S. te Lintel Hekkert, A.F. Linskens, I. Holleman, B.G. Sartakov, G. Pierre and J. Reuss 176 (1993) 171
Photodetachment from laser-desorbed C_2^-, P. Wurz and K.R. Lykke 176 (1993) 185
Photoinduced charge separation in a carotenoid–porphyrin–diquinone tetrad: enhancement of quantum yields via control of electronic coupling, S.-J. Lee, J.M. DeGraziano, A.N. Macpherson, E.-J. Shin, P.K. Kerrigan, G.R. Seely, A.L. Moore, T.A. Moore and D. Gust 176 (1993) 321
Quenching of the excited state of hydrated europium(III) ions by electron transfer, K.M. Christensen, A. Bakac and J.H. Espenson 176 (1993) 359

Picosecond spectroscopy
Amino derivatives of symmetric 1,3,5-triphenylbenzene. Nature of the polar singlet excited state., G. Verbeek, S. Depaemelaere, M. Van der Auweraer, F.C. De Schryver, A. Vaes, D. Terrell and S. De Meutter 176 (1993) 195
Radiative and nonradiative electron transfer in contact radical–ion pairs, I.R. Gould, D. Noukakis, L. Gomez-Jahn, R.H. Young, J.L. Goodman and S. Farid 176 (1993) 439
Dynamical solvent effects in inverted region electron transfer, J.M. Zaleski, W. Wu, C.K. Chang, G.E. Leroi, R.I. Cukier and D.G. Nocera 176 (1993) 483
Experimental and theoretical study of inhomogeneous electron transfer in betaine: comparisons of measured and predicted spectral dynamics, A.E. Johnson, N.E. Levinger, W. Jarzęba, R.E. Schlief, D.A.V. Kliner and P.F. Barbara 176 (1993) 555
Long range electron transfer in helical polyproline II oligopeptides, M.Y. Ogawa, I. Moreira, J.F. Wishart and S.S. Isied 176 (1993) 589
Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll–porphyrin–acceptor triads, G.P. Wiederrecht, S. Watanabe and M.R. Wasielewski 176 (1993) 601
Insights into the factors controlling the rates of the deactivation processes that compete with charge separation in photosynthetic reaction centers, L. Laporte, L.M. McDowell, C. Kirmaier, C.C. Schenck and D. Holten 176 (1993) 615

Atomic and molecular beam techniques
Exciplex formation in jet-cooled donor–bridge–acceptor compounds incorporating bridges with three degrees of flexibility, B. Wegewijs, T. Scherer, R.P.H. Rettschnick and J.W. Verhoeven 176 (1993) 349

Time-resolved experiments
Electronic dephasing studies of molecules in solution at room temperature by femtosecond degenerate four wave mixing, T. Joo and A.C. Albrecht 176 (1993) 233
Photochemical probes of intramolecular electron and energy transfer, Y. Wang and K.S. Schanze 176 (1993) 305
Photoinduced charge separation in a carotenoid–porphyrin–diquinone tetrad: enhancement of quantum yields via control of electronic coupling, S.-J. Lee, J.M. DeGraziano, A.N. Macpherson, E.-J. Shin, P.K. Kerrigan, G.R. Seely, A.L. Moore, T.A. Moore and D. Gust 176 (1993) 321
Electron transfer chemistry of hydride and carbanion donors. Hydride and carbanion transfer via electron transfer, S. Fukuzumi, T. Kitano, M. Ishikawa and Y. Matsuda 176 (1993) 337
Quenching of the excited state of hydrated europium(III) ions by electron transfer, K.M. Christensen, A. Bakac and J.H. Espenson 176 (1993) 359
Electron transfer reactions at CdS semiconductor cluster interfaces. Adsorption and microenvironment effects on oxidative reactions, J.R. Cowdery-Corvan, D.G. Whitten and G.L. McLendon 176 (1993) 377
Observation of temperature independent heterogeneous electron transfer reactions in the inverted Marcus region, J.E. Moser and M. Grätzel 176 (1993) 493
Experimental and theoretical study of inhomogeneous electron transfer in betaine: comparisons of measured and predicted spectral dynamics, A.E. Johnson, N.E. Levinger, W. Jarzęba, R.E. Schlief, D.A.V. Kliner and P.F. Barbara 176 (1993) 555
Long range electron transfer in helical polyproline II oligopeptides, M.Y. Ogawa, I. Moreira, J.F. Wishart and S.S. Isied 176 (1993) 589

Mass spectrometry
Photodetachment from laser-desorbed C_2^-, P. Wurz and K.R. Lykke 176 (1993) 185

Neutron scattering
Inelastic neutron-scattering study of the proton dynamics in N-methylacetamide at 20 K, F. Fillaux, J.P. Fontaine, M.-H. Baron, G.J. Kearley and J. Tomkinson 176 (1993) 249
The effects of NH_3 free rotation on the inelastic neutron scattering spectrum of $Ni(NH_3)_2Ni(CN)_4 \cdot 2C_6D_6$ at 20 K, G.J. Kearley, G. Coddens, F. Fillaux, J. Tomkinson and W. Wegener 176 (1993) 279

Objects

Bulk systems

Supersonic beams
Multiphoton multi laser spectroscopy of the ν_3 mode of SF_6 in a molecular beam, S. te Lintel Hekkert, A.F. Linskens, I. Holleman, B.G. Sartakov, G. Pierre and J. Reuss 176 (1993) 171

Exciplex formation in jet-cooled donor–bridge–acceptor compounds incorporating bridges with three degrees of flexibility, B. Wegewijs, T. Scherer, R.P.H. Rettschnick and J.W. Verhoeven 176 (1993) 349

Liquids mixtures and solutions

Simulation of water solutions of Ni^{2+} at infinite dilution, M.N.D.S. Cordeiro, A. Ignaczak and J.A.N.F. Gomes 176 (1993) 97

The mechanism of intramolecular energy transfer in terminally substituted polyene molecules, N. Holl, H. Port, H.C. Wolf, H. Strobel and F. Effenberger 176 (1993) 215

Electronic dephasing studies of molecules in solution at room temperature by femtosecond degenerate four wave mixing, T. Joo and A.C. Albrecht 176 (1993) 233

Electron transfer chemistry of hydride and carbanion donors. Hydride and carbanion transfer via electron transfer, S. Fukuzumi, T. Kitano, M. Ishikawa and Y. Matsuda 176 (1993) 337

Well and barrier dynamics and electron transfer rates. A molecular dynamics study, B.B. Smith, A. Staib and J.T. Hynes 176 (1993) 521

Crystals

Exchange mediated pairing as a source of superconductivity in alkali-doped C_{60}, L. Jansen, L. Chandran and R. Block 176 (1993) 1

Symmetry states of vibronic Frenkel excitons, M. Georgiev and J. Singh 176 (1993) 47

Jahn–Teller distortions in solid C_{20} and other fullerene structures, G.B. Adams, O.F. Sankey, J.B. Page and M. O'Keeffe 176 (1993) 61

Inelastic neutron-scattering study of the proton dynamics in N-methylacetamide at 20 K, F. Fillaux, J.P. Fontaine, M.-H. Baron, G.J. Kearley and J. Tomkinson 176 (1993) 249

Glasses

Effect of tunneling systems on impurity homogeneous optical bands in amorphous solids, D.V. Donskoi, N.N. Zaitsev and I.S. Osad'ko 176 (1993) 135

Liquid crystals

UV–visible linear dichroism of naphthalene bicarboxylic acid derivatives dissolved in nematic liquid crystal, D. Bauman and H.-G. Kuball 176 (1993) 221

Polymers

Analysis of static and dynamic electron and spin properties within the interaction space of the one-dimensional Hubbard chain; a path-integral quantum Monte Carlo approach, M.C. Böhm, J. Schulte and S. Philipp 176 (1993) 109

Effect of tunneling systems on impurity homogeneous optical bands in amorphous solids, D.V. Donskoi, N.N. Zaitsev and I.S. Osad'ko 176 (1993) 135

Semiconductors

Symmetry states of vibronic Frenkel excitons, M. Georgiev and J. Singh 176 (1993) 47

Electron transfer reactions at CdS semiconductor cluster interfaces. Adsorption and microenvironment effects on oxidative reactions, J.R. Cowdery-Corvan, D.G. Whitten and G.L. McLendon 176 (1993) 377

Surfaces
Observation of temperature independent heterogeneous electron transfer reactions in the inverted Marcus region, J.E. Moser and M. Grätzel 176 (1993) 493

Low-dimensional materials
Analysis of static and dynamic electron and spin properties within the interaction space of the one-dimensional Hubbard chain; a path-integral quantum Monte Carlo approach, M.C. Böhm, J. Schulte and S. Philipp 176 (1993) 109

Dielectrics
Self-consistent environmental fluctuation effects on the electronic tunnel factor and the activation Gibbs energy in long-range electron transfer, A.M. Kuznetsov, M.D. Vigdorovich and J. Ulstrup 176 (1993) 539

Biological systems
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. I. Exchange states, *g*-factors, hyperfine interactions, M. Belinskii 176 (1993) 15
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. II. Double exchange in distorted cluster, M. Belinskii 176 (1993) 37
Inhomogeneous electron transfer kinetics in reaction centers of bacterial photosynthesis, Z. Wang, R.M. Pearlstein, Y. Jia, G.R. Fleming and J.R. Norris 176 (1993) 421
The two-state reduction for electron and hole transfer in bridge-mediated electron-transfer reactions, S.S. Skourtis, D.N. Beratan and J.N. Onuchic 176 (1993) 501
Insights into the factors controlling the rates of the deactivation processes that compete with charge separation in photosynthetic reaction centers, L. Laporte, L.M. McDowell, C. Kirmaier, C.C. Schenck and D. Holten 176 (1993) 615

Microscopic systems

Molecules (neutral and ionic)
Jahn–Teller distortions in solid C_{20} and other fullerene structures, G.B. Adams, O.F. Sankey, J.B. Page and M. O'Keeffe 176 (1993) 61
Ab initio calculations of the core ionization spectra of unsaturated hydrocarbons, A. Baldovin, G. De Alti, P. Decleva, G. Fronzoni and A. Lisini 176 (1993) 67
Superexchange pathway calculation of long-distance electron coupling in $H_2C(CH_2)_{m-2}CH_2$ chains, L.A. Curtiss, C.A. Naleway and J.A. Miller 176 (1993) 387
Self-consistent environmental fluctuation effects on the electronic tunnel factor and the activation Gibbs energy in long-range electron transfer, A.M. Kuznetsov, M.D. Vigdorovich and J. Ulstrup 176 (1993) 539

–diatomic
Photodetachment from laser-desorbed C_2^-, P. Wurz and K.R. Lykke 176 (1993) 185

–small polyatomics
Ab initio calculations of the core ionization spectra of unsaturated hydrocarbons, A. Baldovin, G. De Alti, P. Decleva, G. Fronzoni and A. Lisini 176 (1993) 67
A hard shape potential model for atom–symmetric top inelastic cross sections, J.C. Belchior, J.N. Murrell and S.D. Bosanac 176 (1993) 155

Microwave spectrum of $^{35}ClCN$ in excited vibrational states, L.B. Favero, S. Melandri and P.G. Favero 176 (1993) 165

The effects of NH_3 free rotation on the inelastic neutron scattering spectrum of $Ni(NH_3)_2Ni(CN)_4 \cdot 2C_6D_6$ at 20 K, G.J. Kearley, G. Coddens, F. Fillaux, J. Tomkinson and W. Wegener 176 (1993) 279

Electronic coupling through saturated hydrocarbon bridges, M.J. Shephard, M.N. Paddon-Row and K.D. Jordan 176 (1993) 289

–aromatics

Amino derivatives of symmetric 1,3,5-triphenylbenzene. Nature of the polar singlet excited state., G. Verbeek, S. Depaemelaere, M. Van der Auweraer, F.C. De Schryver, A. Vaes, D. Terrell and S. De Meutter 176 (1993) 195

UV–visible linear dichroism of naphthalene bicarboxylic acid derivatives dissolved in nematic liquid crystal, D. Bauman and H.-G. Kuball 176 (1993) 221

Transfer of mobile electrons in organic molecules, S. Larsson and M. Braga 176 (1993) 367

Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll–porphyrin–acceptor triads, G.P. Wiederrecht, S. Watanabe and M.R. Wasielewski 176 (1993) 601

–other large

The mechanism of intramolecular energy transfer in terminally substituted polyene molecules, N. Holl, H. Port, H.C. Wolf, H. Strobel and F. Effenberger 176 (1993) 215

Inelastic neutron-scattering study of the proton dynamics in N-methylacetamide at 20 K, F. Fillaux, J.P. Fontaine, M.-H. Baron, G.J. Kearley and J. Tomkinson 176 (1993) 249

Photoinduced charge separation in a carotenoid–porphyrin–diquinone tetrad: enhancement of quantum yields via control of electronic coupling, S.-J. Lee, J.M. DeGraziano, A.N. Macpherson, E.-J. Shin, P.K. Kerrigan, G.R. Seely, A.L. Moore, T.A. Moore and D. Gust 176 (1993) 321

Hole, electron and energy transfer through bridged systems. VIII. Soliton molecular switching in symmetry-broken Brooker (polymethinecyanine) cations, J.R. Reimers and N.S. Hush 176 (1993) 407

Statistical rate theory of gas-phase electron transfer. The ferrocene/ferrocenium self-exchange reaction, D.E. Richardson and J.R. Eyler 176 (1993) 457

Dynamical solvent effects in inverted region electron transfer, J.M. Zaleski, W. Wu, C.K. Chang, G.E. Leroi, R.I. Cukier and D.G. Nocera 176 (1993) 483

Observation of temperature independent heterogeneous electron transfer reactions in the inverted Marcus region, J.E. Moser and M. Grätzel 176 (1993) 493

Experimental and theoretical study of inhomogeneous electron transfer in betaine: comparisons of measured and predicted spectral dynamics, A.E. Johnson, N.E. Levinger, W. Jarzęba, R.E. Schlief, D.A.V. Kliner and P.F. Barbara 176 (1993) 555

–polymeric and biological

The two-state reduction for electron and hole transfer in bridge-mediated electron-transfer reactions, S.S. Skourtis, D.N. Beratan and J.N. Onuchic 176 (1993) 501

Molecular aggregates

–van der Waals molecules

Ab initio potential energy surface for the collisional system $H^- + H_2$ and properties of its van der Waals complex, J. Stärck and W. Meyer 176 (1993) 83

–clusters
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. I. Exchange states, *g*-factors, hyperfine interactions, M. Belinskii 176 (1993) 15
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. II. Double exchange in distorted cluster, M. Belinskii 176 (1993) 37
Electron transfer reactions at CdS semiconductor cluster interfaces. Adsorption and microenvironment effects on oxidative reactions, J.R. Cowdery-Corvan, D.G. Whitten and G.L. McLendon 176 (1993) 377

–complexes
Quenching of the excited state of hydrated europium(III) ions by electron transfer, K.M. Christensen, A. Bakac and J.H. Espenson 176 (1993) 359
Electrochemical and spectroscopic manifestations of donor–acceptor coupling in cyanide bridged transition metal complexes: Contrasts between Ru–CN–Ru, Co–Ru and Rh–CN–Ru systems, J.F. Endicott, X. Song, M.A. Watzky, T. Buranda and Y. Lei 176 (1993) 427

Free radicals (including hydronium and muonium)
Electron transfer chemistry of hydride and carbanion donors. Hydride and carbanion transfer via electron transfer, S. Fukuzumi, T. Kitano, M. Ishikawa and Y. Matsuda 176 (1993) 337

Ions and charge carriers
Exchange mediated pairing as a source of superconductivity in alkali-doped C_{60}, L. Jansen, L. Chandran and R. Block 176 (1993) 1

Phenomena

Molecular structure
Simulation of water solutions of Ni^{2+} at infinite dilution, M.N.D.S. Cordeiro, A. Ignaczak and J.A.N.F. Gomes 176 (1993) 97
Microwave spectrum of $^{35}ClCN$ in excited vibrational states, L.B. Favero, S. Melandri and P.G. Favero 176 (1993) 165

Vibrations and rotations of molecules
The effects of NH_3 free rotation on the inelastic neutron scattering spectrum of $Ni(NH_3)_2Ni(CN)_4 \cdot 2C_6D_6$ at 20 K, G.J. Kearley, G. Coddens, F. Fillaux, J. Tomkinson and W. Wegener 176 (1993) 279

Electronic structure and states
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. I. Exchange states, *g*-factors, hyperfine interactions, M. Belinskii 176 (1993) 15
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. II. Double exchange in distorted cluster, M. Belinskii 176 (1993) 37
Jahn–Teller distortions in solid C_{20} and other fullerene structures, G.B. Adams, O.F. Sankey, J.B. Page and M. O'Keeffe 176 (1993) 61
Ab initio calculations of the core ionization spectra of unsaturated hydrocarbons, A. Baldovin, G. De Alti, P. Decleva, G. Fronzoni and A. Lisini 176 (1993) 67

Analysis of static and dynamic electron and spin properties within the interaction space of the one-dimensional Hubbard chain; a path-integral quantum Monte Carlo approach, M.C. Böhm, J. Schulte and S. Philipp 176 (1993) 109
Amino derivatives of symmetric 1,3,5-triphenylbenzene. Nature of the polar singlet excited state., G. Verbeek, S. Depaemelaere, M. Van der Auweraer, F.C. De Schryver, A. Vaes, D. Terrell and S. De Meutter 176 (1993) 195
UV–visible linear dichroism of naphthalene bicarboxylic acid derivatives dissolved in nematic liquid crystal, D. Bauman and H.-G. Kuball 176 (1993) 221
Electronic coupling through saturated hydrocarbon bridges, M.J. Shephard, M.N. Paddon-Row and K.D. Jordan 176 (1993) 289
Transfer of mobile electrons in organic molecules, S. Larsson and M. Braga 176 (1993) 367

Electric and magnetic properties
Exchange mediated pairing as a source of superconductivity in alkali-doped C_{60}, L. Jansen, L. Chandran and R. Block 176 (1993) 1
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. I. Exchange states, *g*-factors, hyperfine interactions, M. Belinskii 176 (1993) 15

Optical activity
Transfer of mobile electrons in organic molecules, S. Larsson and M. Braga 176 (1993) 367

Molecular interactions
Simulation of water solutions of Ni^{2+} at infinite dilution, M.N.D.S. Cordeiro, A. Ignaczak and J.A.N.F. Gomes 176 (1993) 97
Inelastic neutron-scattering study of the proton dynamics in N-methylacetamide at 20 K, F. Fillaux, J.P. Fontaine, M.-H. Baron, G.J. Kearley and J. Tomkinson 176 (1993) 249

Spectral bandshapes and intensities
Effect of tunneling systems on impurity homogeneous optical bands in amorphous solids, D.V. Donskoi, N.N. Zaitsev and I.S. Osad'ko 176 (1993) 135
Inelastic neutron-scattering study of the proton dynamics in N-methylacetamide at 20 K, F. Fillaux, J.P. Fontaine, M.-H. Baron, G.J. Kearley and J. Tomkinson 176 (1993) 249

Coupling of electronic and nuclear motion
Jahn–Teller distortions in solid C_{20} and other fullerene structures, G.B. Adams, O.F. Sankey, J.B. Page and M. O'Keeffe 176 (1993) 61
Self-consistent environmental fluctuation effects on the electronic tunnel factor and the activation Gibbs energy in long-range electron transfer, A.M. Kuznetsov, M.D. Vigdorovich and J. Ulstrup 176 (1993) 539

Energy transfer processes
Symmetry states of vibronic Frenkel excitons, M. Georgiev and J. Singh 176 (1993) 47
A hard shape potential model for atom–symmetric top inelastic cross sections, J.C. Belchior, J.N. Murrell and S.D. Bosanac 176 (1993) 155
Microwave spectrum of $^{35}ClCN$ in excited vibrational states, L.B. Favero, S. Melandri and P.G. Favero 176 (1993) 165
The mechanism of intramolecular energy transfer in terminally substituted polyene molecules, N. Holl, H. Port, H.C. Wolf, H. Strobel and F. Effenberger 176 (1993) 215

Photochemical probes of intramolecular electron and energy transfer, Y. Wang and K.S. Schanze 176 (1993) 305
Superexchange pathway calculation of long-distance electron coupling in $H_2C(CH_2)_{m-2}CH_2$ chains, L.A. Curtiss, C.A. Naleway and J.A. Miller 176 (1993) 387

Molecular photophysical processes
Photodetachment from laser-desorbed C_2^-, P. Wurz and K.R. Lykke 176 (1993) 185
Amino derivatives of symmetric 1,3,5-triphenylbenzene. Nature of the polar singlet excited state., G. Verbeek, S. Depaemelaere, M. Van der Auweraer, F.C. De Schryver, A. Vaes, D. Terrell and S. De Meutter 176 (1993) 195
Photoinduced charge separation in a carotenoid–porphyrin–diquinone tetrad: enhancement of quantum yields via control of electronic coupling, S.-J. Lee, J.M. DeGraziano, A.N. Macpherson, E.-J. Shin, P.K. Kerrigan, G.R. Seely, A.L. Moore, T.A. Moore and D. Gust 176 (1993) 321
Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll–porphyrin–acceptor triads, G.P. Wiederrecht, S. Watanabe and M.R. Wasielewski 176 (1993) 601
Insights into the factors controlling the rates of the deactivation processes that compete with charge separation in photosynthetic reaction centers, L. Laporte, L.M. McDowell, C. Kirmaier, C.C. Schenck and D. Holten 176 (1993) 615

Intramolecular dynamics
Hole, electron and energy transfer through bridged systems. VIII. Soliton molecular switching in symmetry-broken Brooker (polymethinecyanine) cations, J.R. Reimers and N.S. Hush 176 (1993) 407
Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll–porphyrin–acceptor triads, G.P. Wiederrecht, S. Watanabe and M.R. Wasielewski 176 (1993) 601

–vibrational energy redistribution (including vibrational dissociation)
Exciplex formation in jet-cooled donor–bridge–acceptor compounds incorporating bridges with three degrees of flexibility, B. Wegewijs, T. Scherer, R.P.H. Rettschnick and J.W. Verhoeven 176 (1993) 349

Luminescence spectra, yields and lifetimes
Exciplex formation in jet-cooled donor–bridge–acceptor compounds incorporating bridges with three degrees of flexibility, B. Wegewijs, T. Scherer, R.P.H. Rettschnick and J.W. Verhoeven 176 (1993) 349
Radiative and nonradiative electron transfer in contact radical–ion pairs, I.R. Gould, D. Noukakis, L. Gomez-Jahn, R.H. Young, J.L. Goodman and S. Farid 176 (1993) 439

Non-linear responses (including optical)
Hole, electron and energy transfer through bridged systems. VIII. Soliton molecular switching in symmetry-broken Brooker (polymethinecyanine) cations, J.R. Reimers and N.S. Hush 176 (1993) 407

Multiphoton phenomena
Multiphoton multi laser spectroscopy of the ν_3 mode of SF_6 in a molecular beam, S. te Lintel Hekkert, A.F. Linskens, I. Holleman, B.G. Sartakov, G. Pierre and J. Reuss 176 (1993) 171

Reactions (including dissociation)
The two-state reduction for electron and hole transfer in bridge-mediated electron-transfer reactions, S.S. Skourtis, D.N. Beratan and J.N. Onuchic 176 (1993) 501

–gas phase
Statistical rate theory of gas-phase electron transfer. The ferrocene/ferrocenium self-exchange reaction, D.E. Richardson and J.R. Eyler 176 (1993) 457

–condensed phase
Well and barrier dynamics and electron transfer rates. A molecular dynamics study, B.B. Smith, A. Staib and J.T. Hynes 176 (1993) 521

Electron transfer
Heisenberg model for tetrameric iron clusters in high-potential iron–sulfur proteins. II. Double exchange in distorted cluster, M. Belinskii 176 (1993) 37
Electronic coupling through saturated hydrocarbon bridges, M.J. Shephard, M.N. Paddon-Row and K.D. Jordan 176 (1993) 289
Photochemical probes of intramolecular electron and energy transfer, Y. Wang and K.S. Schanze 176 (1993) 305
Photoinduced charge separation in a carotenoid–porphyrin–diquinone tetrad: enhancement of quantum yields via control of electronic coupling, S.-J. Lee, J.M. DeGraziano, A.N. Macpherson, E.-J. Shin, P.K. Kerrigan, G.R. Seely, A.L. Moore, T.A. Moore and D. Gust 176 (1993) 321
Electron transfer chemistry of hydride and carbanion donors. Hydride and carbanion transfer via electron transfer, S. Fukuzumi, T. Kitano, M. Ishikawa and Y. Matsuda 176 (1993) 337
Exciplex formation in jet-cooled donor–bridge–acceptor compounds incorporating bridges with three degrees of flexibility, B. Wegewijs, T. Scherer, R.P.H. Rettschnick and J.W. Verhoeven 176 (1993) 349
Quenching of the excited state of hydrated europium(III) ions by electron transfer, K.M. Christensen, A. Bakac and J.H. Espenson 176 (1993) 359
Transfer of mobile electrons in organic molecules, S. Larsson and M. Braga 176 (1993) 367
Electron transfer reactions at CdS semiconductor cluster interfaces. Adsorption and microenvironment effects on oxidative reactions, J.R. Cowdery-Corvan, D.G. Whitten and G.L. McLendon 176 (1993) 377
Superexchange pathway calculation of long-distance electron coupling in $H_2C(CH_2)_{m-2}CH_2$ chains, L.A. Curtiss, C.A. Naleway and J.A. Miller 176 (1993) 387
Hole, electron and energy transfer through bridged systems. VIII. Soliton molecular switching in symmetry-broken Brooker (polymethinecyanine) cations, J.R. Reimers and N.S. Hush 176 (1993) 407
Inhomogeneous electron transfer kinetics in reaction centers of bacterial photosynthesis, Z. Wang, R.M. Pearlstein, Y. Jia, G.R. Fleming and J.R. Norris 176 (1993) 421
Electrochemical and spectroscopic manifestations of donor–acceptor coupling in cyanide bridged transition metal complexes: Contrasts between Ru–CN–Ru, Co–Ru and Rh–CN–Ru systems, J.F. Endicott, X. Song, M.A. Watzky, T. Buranda and Y. Lei 176 (1993) 427
Radiative and nonradiative electron transfer in contact radical–ion pairs, I.R. Gould, D. Noukakis, L. Gomez-Jahn, R.H. Young, J.L. Goodman and S. Farid 176 (1993) 439
Statistical rate theory of gas-phase electron transfer. The ferrocene/ferrocenium self-exchange reaction, D.E. Richardson and J.R. Eyler 176 (1993) 457

Solvent relaxation dynamics and electron transfer, M. Bixon and J. Jortner 176 (1993) 467
Dynamical solvent effects in inverted region electron transfer, J.M. Zaleski, W. Wu, C.K. Chang, G.E. Leroi, R.I. Cukier and D.G. Nocera 176 (1993) 483
Observation of temperature independent heterogeneous electron transfer reactions in the inverted Marcus region, J.E. Moser and M. Grätzel 176 (1993) 493
The two-state reduction for electron and hole transfer in bridge-mediated electron-transfer reactions, S.S. Skourtis, D.N. Beratan and J.N. Onuchic 176 (1993) 501
Well and barrier dynamics and electron transfer rates. A molecular dynamics study, B.B. Smith, A. Staib and J.T. Hynes 176 (1993) 521
Self-consistent environmental fluctuation effects on the electronic tunnel factor and the activation Gibbs energy in long-range electron transfer, A.M. Kuznetsov, M.D. Vigdorovich and J. Ulstrup 176 (1993) 539
Experimental and theoretical study of inhomogeneous electron transfer in betaine: comparisons of measured and predicted spectral dynamics, A.E. Johnson, N.E. Levinger, W. Jarzęba, R.E. Schlief, D.A.V. Kliner and P.F. Barbara 176 (1993) 555
Solvent dynamical effects in electron transfer: molecular dynamics simulations of reactions in methanol, D.K. Phelps, M.J. Weaver and B.M. Ladanyi 176 (1993) 575
Long range electron transfer in helical polyproline II oligopeptides, M.Y. Ogawa, I. Moreira, J.F. Wishart and S.S. Isied 176 (1993) 589
Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll–porphyrin–acceptor triads, G.P. Wiederrecht, S. Watanabe and M.R. Wasielewski 176 (1993) 601
Insights into the factors controlling the rates of the deactivation processes that compete with charge separation in photosynthetic reaction centers, L. Laporte, L.M. McDowell, C. Kirmaier, C.C. Schenck and D. Holten 176 (1993) 615

Ionization (including Rydberg states)
Ab initio calculations of the core ionization spectra of unsaturated hydrocarbons, A. Baldovin, G. De Alti, P. Decleva, G. Fronzoni and A. Lisini 176 (1993) 67

Molecular motion (including diffusive)
Dynamical solvent effects in inverted region electron transfer, J.M. Zaleski, W. Wu, C.K. Chang, G.E. Leroi, R.I. Cukier and D.G. Nocera 176 (1993) 483

Fluctuations and noise
Well and barrier dynamics and electron transfer rates. A molecular dynamics study, B.B. Smith, A. Staib and J.T. Hynes 176 (1993) 521

Surface effects and catalysis
Electron transfer reactions at CdS semiconductor cluster interfaces. Adsorption and microenvironment effects on oxidative reactions, J.R. Cowdery-Corvan, D.G. Whitten and G.L. McLendon 176 (1993) 377

Phase transitions
Analysis of static and dynamic electron and spin properties within the interaction space of the one-dimensional Hubbard chain; a path-integral quantum Monte Carlo approach, M.C. Böhm, J. Schulte and S. Philipp 176 (1993) 109
